

BOARD POLICY

WESTERN IOWA TECH COMMUNITY COLLEGE

Series Number 601

Title Educational Program and Instruction

Statement of Guiding Principles

Western Iowa Tech Community College subscribes to the philosophy that each student should have the opportunity to develop his or her human resources to the maximum of individual capabilities, talents, and diligence. A major goal of the College shall be to provide a flexible educational environment which will satisfy the needs of those who desire a liberal arts or pre-professional education, youth and adults who desire specialized vocational or technical training, and those who need retraining, enrichment, and/or improvement of skills or knowledge.

To meet the needs of this diverse clientele, multiple programs shall be provided within each of the major subject areas, as well as curricula which are varied according to the abilities, interests, and goals of the student population.

The community should become, as far as possible, a laboratory for practical instruction wherein people and resources of the community are used to supplement the educational program.
